## THIS IS A ROAD TRIP OF COASTAL BEAUTY AND LIFE'S SIMPLE PLEASURES

— The Great Eastern Drive is one of five drive journeys that span a network of roads and potential itineraries across Tasmania. Each drive journey is designed to showcase a diversity of travel experiences within that region, as a way to help travellers plan their road trips according to their interests and available time.

The Great Eastern Drive meanders through laidback seaside towns along a stunning stretch of coastline and uncrowded, white-sand beaches, and into the hinterland. Take in the perfect arc of Wineglass Bay and national parks threaded with walking tracks.

Enjoy the rare pleasure of meeting the people who harvest and shuck the oysters you're eating. Make time for cellar-door chatting and tastings at boutique wineries near Cranbrook.

Take a break at Triabunna and catch the ferry to Maria Island, a national park criss-crossed by walking trails, and full of geological wonders and fascinating human history. This is a car-free haven for abundant wildlife, especially wombats. This is a special place to observe – but not touch – wildlife in its natural habitat.
